Professional Summary

Results-driven Front-End Developer with 3.5+ years of commercial experience designing and delivering enterprise-grade Single Page Applications (SPA) using Angular (v10–v18) and React.js. Proven track record of building scalable, mobile-friendly, and cross-browser compatible web applications serving 5,000+ active users. Proficient in JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Bootstrap 5, and Tailwind CSS. Strong expertise in RESTful API integration, JWT authentication, performance optimisation, and WCAG 2.1 accessibility. Experienced collaborating in Agile/Scrum environments with back-end developers, UI/UX designers, and product owners. Based in Dubai, UAE — available immediately, no sponsorship required.

Technical Skills

TECHNICAL SKILLS

Programming Languages : JavaScript (ES6+), TypeScript, HTML5, CSS3

Operating Systems : Windows 7/8/10/11, macOS

Frontend Frameworks & Libraries : Angular (v10–v18), React.js, Next.js

Frontend Architecture & State Management : RxJS, NgRx, Redux, Redux Toolkit, Context API

Server-Side Technologies : Node.js, NestJS, Express.js

Backend Development : REST APIs, JWT Authentication, RBAC, API Integration

ORMs & Database Tools : Sequelize.js, TypeORM

UI Technologies : Bootstrap 5, Tailwind CSS, Angular Material, Material UI, SCSS, SASS

JavaScript Module Bundlers / Build Tools : Webpack, Vite, Angular CLI, NPM, Gulp

Version Control Tools : Git, GitHub, Bitbucket

Development Tools : VS Code, Chrome DevTools, Postman, Jira

App/Web Servers : Node.js Runtime Environment, IIS

Development Methodologies : Agile, Scrum

Best Practices : Responsive Web Design, Cross-Browser Compatibility, SEO Optimization, WCAG 2.1 Accessibility, Clean Code, Design Patterns, Code Refactoring

Work Experience

Infosys Ltd

Pune, India

Angular / React Front-End Developer

April 2021 - December 2024

- Developed and maintained scalable Angular (v10–v18) and React.js enterprise SPAs for financial and enterprise platforms serving 5,000+ active users across multiple business units.
- Engineered reusable UI component libraries with Angular Material, Bootstrap 5, and Tailwind CSS, reducing feature development time by 30% and ensuring visual consistency.
- Optimised application performance by 45% through lazy loading, OnPush change detection, code splitting, tree shaking, and virtual scrolling techniques.
- Integrated RESTful APIs using Angular HTTP Client and RxJS Observables; implemented JWT authentication, Route Guards, and Role-Based Access Control (RBAC).
- Delivered WCAG 2.1 accessible and SEO-optimised interfaces using semantic HTML5, ARIA roles, meta tags, and keyboard navigation best practices.

- Refactored and modernised legacy codebases by applying SOLID principles, clean code standards, and scalable frontend architecture patterns.
- Troubleshoot and resolved production bugs and cross-browser compatibility issues using Chrome DevTools, reducing incident response time significantly.
- Configured and maintained Webpack, Vite, and Angular CLI build pipelines; integrated CI/CD workflows for automated testing and deployment.
- Collaborated in Agile/Scrum sprints with back-end developers, UI/UX designers, QA engineers, and product owners using Git version control and JIRA.
- Authored technical documentation, code review guidelines, and frontend development standards adopted across the team.

Key Projects

Order Management System – Financial Platform

Angular | TypeScript | RxJS | REST APIs | Angular Material | JWT

- Built responsive Angular dashboards for order processing, billing, and payment workflows serving a high-volume financial platform.
- Implemented OnPush change detection, lazy-loaded modules, and optimised API calls, improving load speed by 40%.
- Secured application with JWT authentication and RBAC; partnered with back-end teams on API contract design and validation.

Smart Appointment Scheduler – Full-Stack Web Application

Angular | Bootstrap 5 | RxJS | REST APIs | WCAG 2.1

- Developed responsive scheduling and booking modules with real-time data synchronisation using Angular and RxJS.
- Built WCAG 2.1 accessible UI components with reactive form validation and robust API error handling for a seamless user experience.

Task Manager Application – MERN Stack

React.js | Node.js | Express.js | MongoDB | Tailwind CSS | JWT

- Developed a full-stack task management SPA in React.js using Hooks, React Router, and JWT authentication with drag-and-drop Kanban functionality.
- Designed a responsive Tailwind CSS interface with search, filters, analytics dashboard, and real-time notifications, demonstrating React.js proficiency alongside Angular.

Education

University of Pune

January 2021

Bachelor of Engineering (B.E.) | Computer Engineering

Pune, India
